GLASGOW AGAINST GENOCIDE

STOP COP CITY

CLYDESIDE INDUSTRIAL WORKERS OF THE WORLD recently picketed AXA Ltd in Argyle St for their role as the insurers for Cop City in Atlanta, USA.

Cop City is the name given by protesters against the mega police military training centre, which is planned to be built in Weelaunee Forest, a watershed surrounded by primarily Black residents who overwhelmingly oppose the project.

The corporate funded plans include military-grade training facilities, a mock city to

practice urban warfare, dozens of shooting ranges, and a Black Hawk helicopter landing pad. It may also be used for training international paramilitary police, including the IDF in Israel. AXA is on the Boycott, Divestment, Sanctions list.

The picket was held on the anniversary of the police murder of Manuel Paez Terán, known as 'Tortuguita', an IWW member shot 57 times during a police raid on the protest camp.

ANARCHIST CRITIC

IT ALL FLOWS under the bridge like a river in spate, inequality, greed and the rip-off society. Though some things are glaringly obvious, they always seem to get away with it, as they sip their champagne.

One such glaring inequality that will pass without a ripple is the recently released fact that in the first 3 days of this year 2024, FTSE 100 bosses earned the annual average UK salary.

If the average annual salary is enough to live on then these FTSE bosses should retire for the rest of the year. However, they won't, they'll keep the rip-off cash rolling into their already fat bank accounts, pension funds and other tax dodging ventures, they can never get enough, their greed is insatiable.

THE ODDS ARE STACKED

Another glaring greedy grasp that will pass without a ripple, while millions struggle to heat their homes and feed their family, is the fact the the boss of Bet365, one

Denise Coates will see her pay check leap to £221 million. I know she feels she needs that sort of salary to allow her to live her self indulgent worthless life style, all paid for by all those who try to make a little extra cash, to help them out.

When will we ever learn, we struggle while these rip-off merchants plunder every penny of the wealth that we the population create, and it us that creates every nut and bolt, every truck load, every building ever created, every ship and all their bounteous cargo, all fashioned and built by our hands, only to see it plundered by the parasite class that we carry on our shoulders.

FOOD NOT BOMBS GLASGOW are a group of activists who provide free food as a protest against inequality, poverty, war and injustice.

Food Not Bombs is an anti-capitalist mutual aid group with chapters all over the world. We believe in building strong communities and helping one another. We also believe food should be free and accessible to everyone.

In a society that puts profit before people, huge amounts of resources go to waste. While millions go hungry, landfills are piled high with perfectly edible food.

The bulk of our meals are made from ingredients that would otherwise be thrown away, for example products that have passed their sell by date, or bruised fruit and veggies.

We know there's enough food for everyone, and we can prove it.

BIG RIDE FOR PALESTINE CYCLISTS stopped off at Barclays Bank in Argyle Street to protest at its bankrolling of Israel's genocidal attack on Palestinians.

Barclays remains complicit with Israel's apartheid system. The bank faced a similar boycott campaign over its financial support for South African apartheid before eventually being forced to divest in 1986.

GLASGOW IS HOACHIN with buildings and streets named after old slave merchants and imperialist butchers. Here's a bit though about a more recent scoundrel...

Sir Graham Hills building at Strathclyde University in George Street is named after the Chancellor at that time, who was good friends with Mrs Thatcher

and had suggested that a solution for unemployment was to sterilise the unemployed to 'prevent them from reproducing'

STEADFAST AGAINST RACISM

ANTI-RACIST CAMPAIGNERS at Erskine have marked a full year of standing steadfast against a mixed pokey bag of hard-boiled nazis, racist oddfellows, and a smattering of local soor-ploom bigots.

In February 2023, 200 asylum seekers were bussed in at dawn in a police convoy to the Muthu Hotel, in a covert Home Office operation. Local reactionaries took the unforgivable decision to invite nazis into the community, and Patriotic Alternative appeared, keen to capitalise on the anti-immigrant riot at Knowsley in Merseyside. They arrived complete with a mini-Nuremberg stadium made of scaffolding.

FIGHTBACK

But every Sunday for 52 weeks local anti-racists have been joined by trade unionists and socialists from Paisley, Clydebank and

Glasgow in a powerful show of solidarity.

The big breakthrough came some months into the campaign, when the asylum seekers defied Home Office directives and came out to join the counter protest.

It changed the whole character of the day. Each week they come out for a game of football, play music, have a bite to eat, and occasionally fly a kite. Meanwhile the remaining few local racists hide behind tarpaulin screens, nursing their bigotry to keep it warm.

As the asylum seekers win their cases and move into the community, the fascist misinformation has been trashed. There is a couple of guys that should be kept an eye on... but only by football scouts. There's one or two classy players there.

LIVING RENT took action outside Housing Associations in Glasgow to ask them to put pressure on Mears to stop the evictions.

Members across the city came together to ask Housing Associations that use Mears as a housing provider or for repairs

for support in demanding that Mears call off the evictions of up to 1,400 asylum seekers.

In our community, there is power as long as we stand together!

Join Living Rent to show Mears that we won't let them evict our neighbours.
